To Whom it May Concern:

It is with great pleasure and admiration that I get to tell you about Texas Alternative Home School program and Dr. Shawn Clark

I have worked with Dr. Clark for a number of years, and I am very impressed with his attention to detail, and his willingness to help our students. Dr. Clark always answers his phone and gives us advice on students when we ask for it. He is always very prompt to arrive at school and is very informative and pleasant to parents with questions. Any school that I work at in the future, I will always use Dr. Clark and the Texas Alternative Home School program.

We have several students that would not graduate if it were not for Dr. Clark and his program. Many of our students do not have the support system at home, have parents who must work multiple jobs or work late, or the students have to work to help support the family. Some students have so much going on in their lives that school is not a priority. Dr. Clark helps students realize that a high school diploma will help them out later in life and open more doors for them. With a high school diploma, they can get into trade schools, jr. colleges, or 4-year colleges.

The Texas Alternative Home School program allows our struggling students who might drop out to get a high school diploma. It is an invaluable service to our students and one that our students and parents are grateful for.

If any school district has students like ours that could use a little help, I highly recommend Dr. Clark and his Texas Alternative Home School Program. He gives students a way to gain a high school diploma, that might not receive one otherwise. His services are greatly appreciated.

Sincerely,

Shawn Bradford
